

IMPORTANT INFORMATION about your first CHEM 110 LAB SESSION

WHERE: lab room FR308

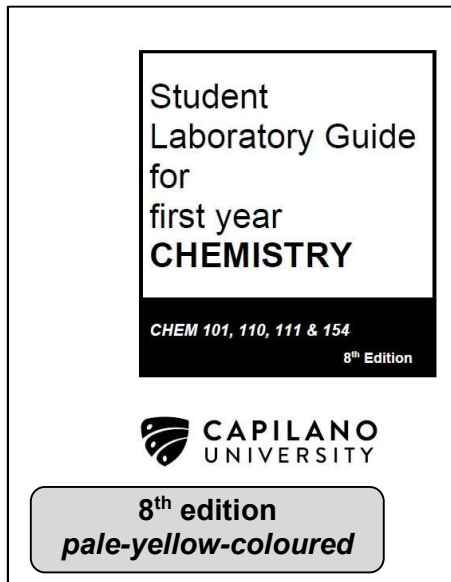

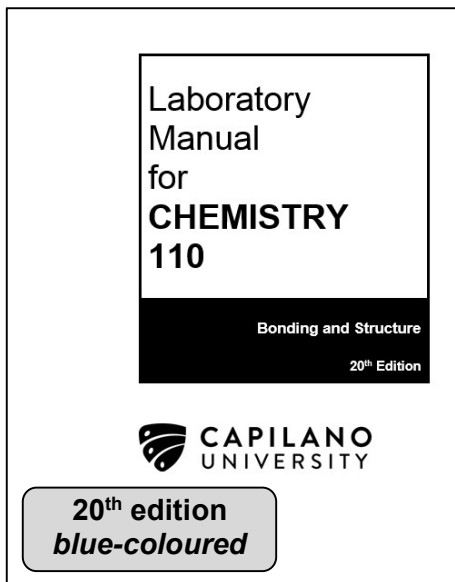

WHEN: see here →

section	date and start-time of first lab		
110 L1	Monday	Sept. 10	11:30 am
110 L2	Tuesday	Sept. 11	1:00 pm
110 L3	Wednesday	Sept. 12	11:30 am
110 L4	Wednesday	Sept. 12	4:00 pm
110 L5	Thursday	Sept. 13	1:00 pm
110 L6	Friday	Sept. 14	11:30 am

Please arrive on time. Attendance is mandatory. If you miss the first lab, then you are not permitted to continue with the laboratory portion of the course.

PURCHASE at the BOOKSTORE:

bring all items to the first lab session

safety glasses

or....

safety goggles*

You already have this if you've done Chem 101.

All students must have eye-protection, including those who wear prescription glasses. More information is given on the next page.

FIRST LAB SESSION – EXP #0

Approximately 2 hours of advance preparation is required before you come!

Pages 7 - 8 of the Chem 110 Lab Manual list everything that you must do before attending the first lab session. A lot is required. Please come fully prepared to the lab. Along with readings and videos to watch online, there are also forms to fill out.

EYE-PROTECTION

The online video titled "Safety in the Chemistry Laboratory" (see p 8 of the lab manual) discusses this topic, starting at the 6 minute 50 second mark, and shows examples of various styles of safety glasses and what you should purchase at the bookstore.

Choose carefully as safety glasses or goggles cannot be returned to the bookstore if already removed from the packaging.

Safety Glasses: These are meant for anyone not wearing contact lenses.

The bookstore sells three types of glasses, as noted on the label at the end of each box.

- the code "**OTG**" means "over the glasses" and should be used by students wearing their regular prescription glasses underneath.
- the code "**LNP**" means "low nose profile" and is recommended for petite students.
- a box with no code, other than, for example "Astrospec 3000" is the "regular" style recommended for all remaining students that don't fit in the first two categories.

Safety Goggles: Only students who wear contact lenses in the lab should purchase safety goggles from the bookstore. These wrap fully around your face but fog up rapidly, becoming difficult to see through. For this reason, **contact-lens wearers should instead wear their prescription glasses in the lab** and purchase "OTG" safety glasses instead.

LAB COATS: are not required for Chem 110 but are available at the bookstore

LAB SCHEDULE: will be handed out at the first lab session, also available online

www.capuchem.ca/labs/

Questions? Please visit the chem lab office in room FR308A. You will have to ring the door-bell in the hallway outside of lab room FR306 to be able to reach the lab office.
